6 Conditions of Authorisation

Once an authorisation is granted the applicant is subject to the condition that they meet the requirements set out in Regulation 141. A summary of the conditions is included below, however, for the definitive list of conditions, refer to the Regulations.

Subject to Regulation 141(1A)* and 141(1B), an authorisation, including a restricted authorisation, granted under the Regulations is subject to the conditions that the holder:

- ensures that any refrigerant in their possession is handled by the holder of a licence appropriate for the type of work being undertaken and granted under Regulation 131, 133 or 134; or by someone under the supervision of a holder of such a licence.**
- keeps and reports accurate accounts of refrigerant, checks, maintenance and other actions, as well as the names of licensees undertaking this work, quarterly and/or at the request of the ARC.
- puts into effect a risk management plan relating to the handling and storage of refrigerant in the holder's business and premises.
- possesses and maintains the equipment necessary to carry out the work they are authorised to undertake in order to minimise avoidable emissions of refrigerant; and ensures the equipment is operating correctly. Required equipment includes but is not limited to one or more of the following:
 - leak detectors
 - vacuum pumps
 - recovery units
- undertakes leak testing of any refrigerant container in their possession at least once a quarter.
- uses only refillable containers for storing refrigerant and ensures that destruction of any refrigerant is carried out only by the operator of a refrigerant destruction facility.
- display the authorisation number on any advertising, invoices, receipts and quotes for work carried out under that authorisation.

Note: A number of terms included in these Regulations are defined in the Act, including quarter.

* Under Regulation 141A, the ARC may, on application by the prospective authorisation holder, determine that one or more conditions do not apply.

** if the refrigerant is handled on board an AMSA vessel, the handler must hold either a licence granted under regulation 131, 133 or 134; or an AMSA certificate. For more information on AMSA certification, go to: www.amsa.gov.au
